PROFESSIONAL SUMMARY

Motivated BCA student at Dayananda Sagar University with proven ability to design and deploy full-stack web applications, AI-powered systems, and IoT solutions. Proficient in Python, JavaScript, Flask, REST API development, Git, and SQL. Experienced with object-oriented programming, SDLC practices, and version control workflows. Passionate about software development, data science, and machine learning — actively seeking an entry-level Software Developer or IT Intern role to deliver real-world impact.

PROJECTS

AI Study Partner — Interactive Quiz System

Python

Flask

REST API

Groq API

JavaScript

HTML5

CSS3

→ Built full-stack AI quiz application with Python/Flask backend, REST API endpoints, and responsive HTML/CSS/JS frontend integrated with Groq API for intelligent question generation.

→ Implemented OOP design patterns and MVC architecture to ensure modular, scalable, and maintainable codebase following SDLC best practices.

→ Managed entire development lifecycle — from requirements, debugging, to version control using Git and GitHub with structured commit history.

Hotel Management System — Full-Stack Web App

HTML5

CSS3

JavaScript

Responsive Design

Git

→ Developed a responsive hotel management and room booking web application with dynamic availability system, tourist location pages, and cross-browser compatible UI/UX.

→ Applied responsive web design principles using CSS Flexbox/Grid, ensuring mobile-first compatibility across all screen sizes.

→ Utilized Git and GitHub for version control, maintaining clean branch structure and documented commit history throughout the project lifecycle.

Solar Tracking System — IoT & Embedded Systems

Arduino

C

IoT

Embedded Systems

Sensors

→ Engineered a 180° IoT solar tracking system using Arduino microcontroller, LDR sensors, and servo motors to maximize solar panel energy efficiency.

→ Programmed real-time sensor data acquisition and motor control logic in C, demonstrating hardware-software integration and embedded systems debugging.

→ Applied microcontroller programming and IoT protocol concepts to deliver an end-to-end hardware solution with measurable performance improvement.

EDUCATION

Bachelor of Computer Applications (BCA)

Dayananda Sagar University, Bengaluru

2023 - 2026

6.54 CGPA

2nd PUC - Science Stream

Swamy Vivekananda PU College, Bengaluru

2023

66.33%

SSLC

Swamy Vivekananda Rural English Medium High School

2021

83.04%

CORE COMPETENCIES
